## 2 people have recommended Aliya

"Aliya is a great professional and excellent web designer that gives many options to choose from for every single item of the design. She's also extremely knowledgeable of Wordpress development. She has great patience and working with her is a great pleasure. "

— **Oksana Tanasiv**, *Owner, Oksana Tanasiv Art LLC*, was Aliya's client

"I am honored to endorse Aliya as a talented front-end developer and team member. Hiring Aliya was one of the best decisions I made as Manager of Software Development while at Hook & Loop. There she focused on the presentation layer of a number of projects, working as a design-driven developer who helped bring ideas to life using her HTML, CSS, JS, and JQuery skills. Her solutions were elegant, unique, and always effective, as she helped many projects move from abstract concepts to functional models. Behind the scenes, her code was always clean, structured, and organized, so she could quickly make changes when needed, or could easily pass it on to a colleague. In addition to her front-end work, Aliya was also a smart and curious programmer, learning new techniques and frameworks quickly to solve more complex, in-depth challenges. Aliya is a great collaborator and communicator, working closely with her dev team members, as well as designers and management, making sure projects consistently met expectations. She's a friendly, engaging and kind person; she will be an asset to any dev team."

— **Ted Kusio**, *Manager of Software Development - Infor | Hook & Loop, Infor*, managed Aliya at Infor | Hook & Loop
